

ETIDO UMOREN PETER

SOFTWARE DEVELOPER

SUMMARY

Software developer with experience building production-grade applications and developer tooling. Founder of [CodeOps Studio](#), a mobile IDE for coding on the go with 500+ active users. Also experienced in building desktop applications and exploring system-level development and reverse engineering concepts through experimental projects. Comfortable across the Android stack, from system-level components to UI and product development.

EXPERIENCE

CODEOPS STUDIO

Dec 2023 - Present

Developed [CodeOps Studio](#), a mobile-based IDE for Android supporting 65+ programming languages with syntax highlighting, plugins, on-device code execution features. Scaled to 500+ active users through organic adoption, continuously improving system architecture and developer experience.

DEPENDENCY HAVEN

Jan 2023 - Nov 2023

Developed [Dependency Haven](#), a Maven-style dependency management tool built from scratch to manage dependencies on Android devices. This tool featured an almost complete management pipeline covering resolution, conflict mitigation, artifact downloading, and local caching via a mirror repository.

ANDROID DEVELOPER — FHS MEDIA

Jan 2021 - Oct 2021

Developed an Android application for FHS Media, a student-led digital initiative at Fortune High School Uyo. Built mobile features using Java and XML for internal school use cases and learning tools. Focused on UI development, app functionality, and Android lifecycle management.

ABOUT ME

I am a Computer Science undergraduate known as @euptron online. I enjoy building software systems and developer tools that solve real-world problems through practical engineering and hands-on development.

EDUCATION

**UNIVERSITY OF CALABAR ·
CALABAR, CROSS RIVER STATE
(IN PROGRESS)**

B.Sc. Computer Science

SKILLS

Java
Kotlin
REST APIs
Git / GitHub
Backend Integration
System Design (Basic)
Android Development
Developer Tools & Build Systems
